ARCHIPOL

TOILE DE JOUY

With his eternal teenage looks and his custom-made suit, ArchiPol is a refreshing new and exciting addition to the world of French 'chanson'. If you think, by looking at him, that he's a dull wallflower, wait until hear his music that's when you'll really get to know him. ArchiPol is a rare singer / songwriter that can dissect human nature in a tender, biting and mocking tone, where each song is like an island, with its own specific fauna, flora and atmosphere (which makes his Toile de Jouy a perfect choice).

STAY TUNED FOR 2023

ArchiPol's new album, Au Natural, is to be released in 2023. Au Natural, which is entirely acoustic, includes original songs that tackle serious - and sometimes tragic - topics with almost danceable rhythms.

SIR ARCHIPOL

Having studied at the prestigious the Royal College of Music in London, ArchiPol not only has a solid musical background but just as interesting, is his ability to deploy, at will, a very British delivery - cool, funny, sarcastic, and deadpan (all at the same time) - giving ArchiPol's songs a very special, and sometime, bittersweet twists.
